Quick connection for ftp.digiland.it is linked to 212.48.15.179 and not to 213.209.17.162

Using active connection and forcing 213.209.17.162 does not fix the issue.

Test does not recognize 213.209.17.162 IP but is using 77.32.83.201 which is the IP of my local provider and not the destination IP
