16:42:03 Command: ABOR
16:42:03 Response: 226 ABOR command successful.
16:42:11 Status: Disconnected from server
```

This is an example of invoking the "ABOR" command followed by the "Disconnect" command.

Notice that there is no hand-shaking between the server before disconnecting.

In other word, the FileZilla FTP client disconnects before giving the server a chance to send file stats, and closing message.

Please see the "QUIT" command example that shows the server hand-shaking to the FileZilla Client/user before disconnecting.
